Objective To obtain a career in software development where I can use the skills I've learned and develop them further.

Experience		
RocketBuild Community Hackathon – Austin, TX		2019
With a team at an event hosted by Rocket Software, I created an admin side interface for a charity organization that allowed for existing donors to be searched for by category or keyword and for new donors to be added.		
CRUD Application		2019
Created a React app, which communicated with a database in MongoDB, would display the data in the database on the homepage, allowed new data to be posted to the database and update the homepage to display the new data.		
Destination Weather		2019
Created an application using Open Weather Map's Hourly Forecast API and the Travel Time API to which gives users the weather forecast of their destination at the time of their arrival.
